Swostik Nepal

Software Developer & SAP Business One Consultant

Kathmandu, Nepal · hello@swostikn.com.np · github.com/SwostikN · linkedin.com/in/swostik-nepal-641392268/ · swostikn.com.np

PROFILE

Software developer and SAP Business One consultant who builds and maintains production systems: features and APIs, integrations, and the tests behind them. Developed and deployed Sarbo360, an ERP portal used daily by about 200 staff, including connectIPS bill payments, and the Rotaract District 3292 platform for 6,000+ members. Co-author of Nepal Rastra Bank Working Paper No. 65, presented at CAICE 2026 (Tribhuvan University). First Class BSc (Hons) Computing.

EXPERIENCE

Technical Consultant, SAP Business One — Sep 2025 – Present

Saurabh Group, Tinkune, Kathmandu

- Developed and deployed **Sarbo360**, an ERP portal on SAP Business One used by about 200 staff at Sarbottam Steels and Sarbottam Spinning: React and TypeScript web app, mobile app, and a Node.js API with a posting engine over the SAP Service Layer.
- Built the **connectIPS** bill-payment integration, and made SAP posting idempotent per company so a retried request never creates a duplicate document.
- Investigate and fix production defects, e.g. payment totals that covered only the first page of results, exports that counted cancelled documents, and purchase-order edits that matched lines by position instead of SAP's line numbers.
- Built 50+ SQL queries, stored procedures and print layouts in SAP HANA for sales, purchasing, inventory, finance and production reporting.
- Built and deployed custom add-ons with C#/.NET and the SAP Service Layer; automated controls with Formatted Searches, user-defined objects, transaction notifications and approval procedures.
- Support 100+ SAP users (posting errors, authorisations, training and guides); manage company databases, backups and upgrades, and bulk-load master data with the Data Transfer Workbench.

Economic Research Intern, Research Department — May 2025 – Jul 2025

Nepal Rastra Bank, Baluwatar, Kathmandu

- Built Python and Selenium data-collection pipelines to assemble search-volume series for Nepal's Economic Policy Uncertainty (EPU) index.
- Developed R routines for statistical modelling and visualisation for **NRB Working Paper No. 65**, which I co-authored.

Artificial Intelligence Intern — Jun 2024 – Dec 2024

Cubit Incorporated, Anamnagar, Kathmandu

- Built a document question-answering and summarisation tool (React frontend, Python backend) using retrieval-augmented generation.
- Implemented Monte Carlo pricing simulations; built and evaluated regression models with held-out test sets.

RESEARCH AND PRESENTATION

Nepal, S. (2026). *Refusal Is Not Safety: Retrieval Gates in Health Chatbots Withhold Emergency Advice, Unevenly Across Nepali Scripts.* Preprint, Independent research, Kathmandu.

Sole author: designed and pre-specified the evaluation, built the test set and pipelines, ran the analysis and wrote the paper.

Budha, B. B., Byanjankar, R., Nepal, S. (2026). *Macroeconomic Effects of Economic Policy Uncertainty: Evidence from Nepal.* NRB Working Paper No. 65, Economic Research Department, Nepal Rastra Bank.

Designed the keyword set, normalised search-volume series against a benchmark, applied Hodrick–Prescott decomposition to the aggregate index, and worked on the study's framing (Sections 1–2) as co-author.

Presented at CAICE 2026, Conference on Applied and Innovative Economics (CEDECON's Annual International Conference in Economics), Central Department of Economics, Tribhuvan University, Marriott Kathmandu, Kathmandu, Oct 2026.

SELECTED PROJECTS

Sarbo360 · Developed and deployed · 2026 – present
An ERP portal on top of SAP Business One, with connectIPS bill payments, used daily by about 200 staff.

Rotaract District 3292 Platform · Developed and deployed · 2026
Public website and member platform for 6,000+ Rotaractors in 198 clubs across Nepal and Bhutan.

DocuMed AI · Designed, developed and evaluated · Dissertation 2025 – 2026; continued as research
A Nepali consumer-health chatbot that cites its sources (dissertation title: MediRAG). Auditing it led to my first research paper.

VESTIQ · Designed and developed · Oct 2026 – present
A wardrobe app that digitises your clothes, picks outfits for the weather and the occasion, and tells you when not to buy.

Road Development App · Concept, requirements, data model and UI prototype · Oct 2026 – present
A prototype that puts Nepal's road works in one place: who is responsible, what was promised, what is being built, each record linked to its official source.

Client websites · Developed and deployed · Aug – Oct 2026
Three client sites with admin portals, working forms and email delivery: two rebuilt in Next.js, one given a full CMS.

EDUCATION

BSc (Hons) Computing, First Class Honours — Jan 2024 – Sep 2026
The British College, Kathmandu
Validated by Leeds Beckett University, UK. Dissertation: DocuMed AI (dissertation title: MediRAG), a guardrailed clinical retrieval-augmented generation system.

Certificate of Credit, Level 0 (Foundation Year) — Sep 2022 – Aug 2023
University of the West of England, Bristol

Higher Secondary Education (Science) — Aug 2020 – Jun 2022
Kathmandu Model College, Bagbazar

LEADERSHIP

Rotaract Club of Patan Heritage, District 3292: Treasurer (2026–2027) · International Service Director (2025–2026)

SKILLS

Development	TypeScript, React & Next.js, Node.js, C# / .NET, Python & FastAPI, React Native (Expo), SQL, R
APIs & integration	REST APIs, OpenAPI (contract-first), SAP Service Layer, connectIPS, Supabase, Resend (email)
Testing & delivery	Unit & integration tests, Vitest, pytest, GitHub Actions CI, Git & pull requests, Docker, nginx, Vercel
ERP & data	SAP Business One, SAP HANA, Stored procedures, Print layouts, Data Transfer Workbench, PostgreSQL
Design & docs	Requirements & acceptance criteria, Data modelling (ERD), Technical documentation, User guides
Languages	Nepali (Native), English (Professional)
